# AN EXTRA LAYER OF PROTECTION

Durable coating helps prevent  
chips and cracks.

**Your windshield performs an important job by protecting you from debris that gets kicked up from the road. While it is designed to withstand some impact, dense objects like rocks can cause damage. Even a small chip is a problem if it's in your line of sight and hinders your ability to see the road ahead.**

**Help keep your windshield in great shape and maintain its clarity with a protective coating.**
